

# Electronic Lock Upgrade Available for All Tenants

StoreNow.org 

Tired of pulling up to your unit, only to realize you forgot your keys? We have good news! StoreNow on Brookville Road now offers an electronic lock option called SmartLock to all interested tenants!

This SmartLock eliminates the need for traditional locks. Instead, all you have to do is enter the same code as your gate code, and that's it: You're in!

Turn any unit into a SmartLock-enabled unit for only \$10 a month: A small price for an extra layer of security and convenience. SmartLock-enabled units are also ideal for lockers with multiple tenants, businesses with deliveries, and tenants with more than one unit.

Are you interested in adding this easy-to-use lock to your unit? Contact us at our offices anytime Monday-Friday from 9am-5pm, or Saturday between 9am and 1pm. We'll get you on our installation schedule! Happy storing.

## SmartLock Use Tips

- When entering your code, you only need to press each button once for each number of your code.
- Slide the latch all the way to the right to lock your unit and wait for the lock light to flash. You may also hear a mechanical sound indicating it is successfully locked. Test the door before you leave to ensure it is secure.

**Example:** If your code is **\*2468#**, Press each button once.
